

Promos don't
last forever.
Neither should
retail signage.

The sign may read, "for a limited time only,"
but that hasn't been true in the landfill – until now.

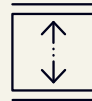

Introducing, printed plastic that is not beneath you (literally).

DegraTECH® checks all the boxes.

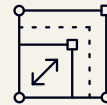

-  Biodegradable
-  Cost-neutral
-  Contains post-industrial waste
-  Recyclable
-  Zero compromise on performance

With indoor and outdoor options

Available in thicknesses 15-60 mil*

Compatible with digital and offset printing

Ready to trim, die-cut, heat-bend and more

*Due to the thickness of 15 mil, virgin styrene is used to create 15 mil DegraTECH. The biodegradation remains the same as the recycled core DegraTECH sheets.

How does DegraTECH do it?

Make the switch at www.DegraTECH.com

Above Board Performance

DegraTECH gives you the exceptional print quality and project flexibility you demand.

Recycled Content

DegraTECH uses recycled post-industrial content to reduce impact without compromise.

Breaks Down Underground

DegraTECH degrades in bioactive landfills to minimize environmental impact.

 **DegraTECH®**
Leave an impact, not a trace

Only at  **flower city**
